

BRADLEY W. MYRICK

Principal Systems Consultant & Security Architect

Email: brad.myrick@pm.me | Portfolio: kodr.pro | GitHub: [BradMyrick](https://github.com/BradMyrick) | X: [@kodr_pro](https://twitter.com/kodr_pro)

PROFESSIONAL SUMMARY

US Army Combat Veteran, Systems Security Specialist, and Senior Software Engineer with over two decades of technical experience. I combine elite software engineering (Rust, EVM bytecode analysis, distributed systems) with real-world experience managing extreme-risk operations in military combat and nuclear power facility dive operations. Specialist in protocol auditing, zero-overhead backend infrastructure, and capability-based security. Currently advising Web3 protocols, infrastructure startups, and defense-adjacent systems as an independent principal consultant via **kodr.pro**.

PRINCIPAL CONSULTING & TECHNICAL EXPERIENCE

Systems & Security Consultant | kodr.pro

2019 – Present

Operating as an independent technology advisory and specialized gun-for-hire systems engineer for high-growth tech startups, Web3 protocols, and security-focused organizations.

- **Blockchain Architecture & Infrastructure (Ok Protocol):** Architected and deployed high-performance node synchronization and execution-layer features in Rust and Cap'n Proto (capnp). Established Kubernetes-backed SRE practices, CI/CD pipelines, and observability suites for high-throughput distributed networks.
- **Blockchain Security & Data Ingestion (TruGard.AI):** Directed core engineering initiatives in EVM bytecode analysis and security profiling. Designed custom high-throughput ETL engines parsing live EVM block data to extract, normalize, and query contract behaviors in Graph databases. Implemented capability-based authentication and cloud-native GCP/KServe deployments.
- **Web3 & Smart Contract Systems (Tacvue.io & Private Clients):** Engineered full-stack decentralized application backends integrated with AWS, Moralis, and custom Solidity smart contract architectures for dynamic on-chain assembly and secure cryptographic minting.
- **Advisory & Auditing:** Conduct independent protocol code reviews, adversarial threat modeling, and zero-trust security audits for early-stage infrastructure teams.

FEATURED PROTOCOLS & RECOGNITION

Author, ERC-8260 (Ethereum Improvement Proposal): Formally authored and published an open-source standard for sovereign on-chain dive log verification and cryptographic data payload structures.

Recipient, Avalanche Foundation Grant (\$15,000 Award): Selected as a finalist and grant recipient for designing the Avalanche Matchmaking Protocol (AMP), an open-source on-chain settlement layer for PvP gaming networks.

FIELD & HIGH-RISK OPERATIONS EXPERIENCE

Diver Foreman & NDT Specialist | Underwater Construction Corp

2014 – 2019

- Directed underwater Non-Destructive Testing (NDT) inspection and nuclear facility repair teams, operating under zero-error nuclear regulatory frameworks.
- Supervised specialized deep-water operations for the Perry Nuclear Deep Dive Team, enforcing absolute operational safety and precision execution under life-critical conditions.

Sergeant & DoD Technical Trainer | US Army & DoD Contracting

2005 – 2012

- **Convoy Protection Team Lead (Iraq, 2008–2009):** Commanded high-risk armed security convoys in active combat zones, leading operational threat assessments and tactical communications.
- **Foreign Military Technical Trainer (DoD, Iraq, 2011–2012):** Provided advanced technical systems instruction and artillery logistics management for international military personnel.

TECHNICAL SKILLS

Core Systems	Rust, Go, Python, TypeScript, Solidity, Cap'n Proto (capnp), WebAssembly (WASM)
Infrastructure & Cloud	Kubernetes, GCP, AWS, OVH, KServe, Docker, Linux Systems Architecture, CI/CD, NixOS
Security & Protocols	Capability-based Auth, EVM Bytecode Analysis, Smart Contract Auditing, Reverse Engineering, Threat Modeling
Data & Systems	Graph Databases, Distributed ETL Pipelines, Bluetooth Low Energy (BLE) Data Parsing, High-Concurrency Network Architecture

EDUCATION & CREDENTIALS

B.Sc., Computer Science — Full Sail University (Salutatorian, Advanced Achievement Award)

Commercial Diver Certification — CDA Technical Institute (D.C.B.C. Unrestricted Diver, NDT Level 2 Certified)
